

Product Name: NIST 800-171 Compliance Program (NCP)

SKU: P15-NCP

Product Page: <https://www.complianceforge.com/product/nist-800-171-compliance-program/>

MSRP: \$5,200 (2024 pricing)

Format: Editable Microsoft Word & Excel documentation templates

Delivery: Electronic download

## NIST 800-171 & CMMC COMPLIANCE DOCUMENTATION SOLUTION

The current version of the NCP covers both NIST 800-171 R3 and NIST 800-171 R2 (including CMMC 2.0) and this means you have the ability to:

1. Ensure coverage for both NIST 800-171 R3 and NIST 800-171 R2 by implementing what is in the NCP; or
2. Focus only on NIST 800-171 R2 & CMMC 2.0 requirements by deleting NIST 800-171 R3 specific controls from the NCP; or
3. Focus only on NIST 800-171 R3 requirements by deleting NIST 800-171 R2 specific controls from the NCP.

The NCP is a compilation of editable Microsoft Word, Excel and PowerPoint templates. There is no software to install and it is a one-time purchase. You get the following material as part of the NCP:

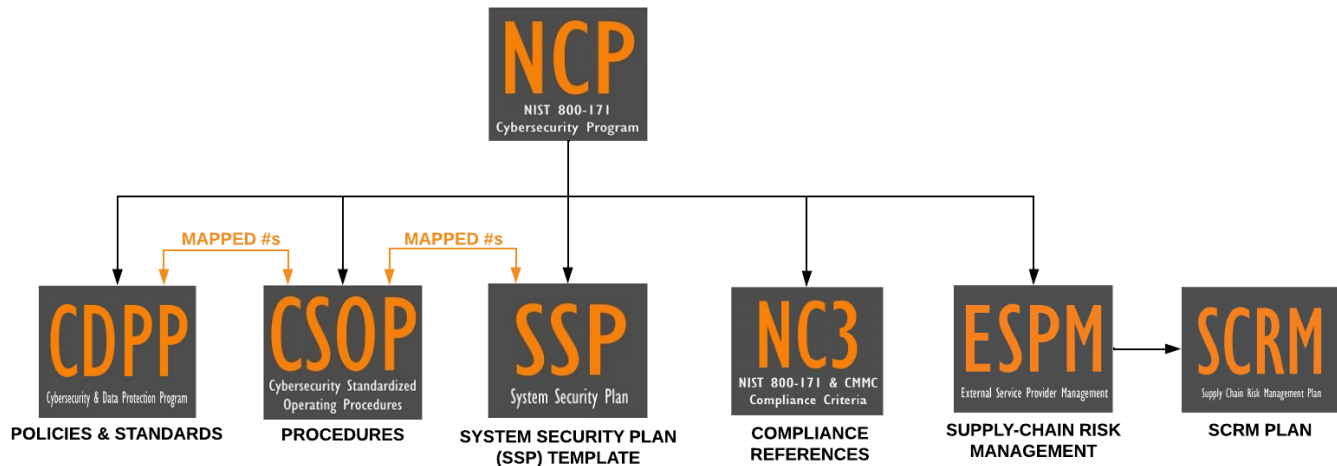

- Updated Coverage For Both NIST 800-171 R2 & R3 (mapped to the Assessment Objective level of NIST 800-171A)
- Cybersecurity Policies (policies specific to NIST 800-171 and CMMC 2.0 L2)
- Cybersecurity Standards (standards that are specific to NIST 800-171 and CMMC 2.0 L2)
- Cybersecurity Standardized Operating Procedures (SOP) (procedures that are specific to NIST 800-171 and CMMC 2.0 L2)
- Supply Chain Risk Management (SCRM) Plan
- Risk Assessment Worksheet & Report Template (perform a risk & threat assessment using Microsoft Word and Excel)
- System Security Plan (SSP) Template
- Plan of Action & Milestones (POA&M) Template
- Provides coverage for related compliance requirements found in:
  - Defense Federal Acquisition Regulation Supplement (DFARS) 252.204-7008, 252.204-7012, 252.204-7019, 252.204-7020 and 252.204-7021;
  - Federal Acquisition Regulation (FAR) 52.204-21, 52.204-27 and Section 889;
  - International Traffic in Arms Regulation (ITAR).
- A Considerable Number of Reference Documents and Other Templates:
  - Risk catalog
  - Threat catalog
  - Evidence Request List (ERL)
  - Incident Response Plan (IRP) template
  - Business Impact Analysis (BIA) template
  - Business Continuity / Disaster Recovery (BC/DR) template
  - Data classification & handling guidelines
  - Data retention guidelines
  - Rules of behavior (acceptable use)
  - Mobile device usage guidelines
  - Risk management guidelines
  - System hardening guidelines
  - and more!

## NO SOFTWARE TO INSTALL

The NCP is editable documentation, so there is no software to install. If you can use Microsoft Word and Excel, then you can edit the NCP for your organization's specific needs. The NCP can save your organization hundreds of hours in labor-related expenses by leveraging a professionally-written solution for your documentation needs.

## COMPREHENSIVE DOCUMENTATION SOLUTION

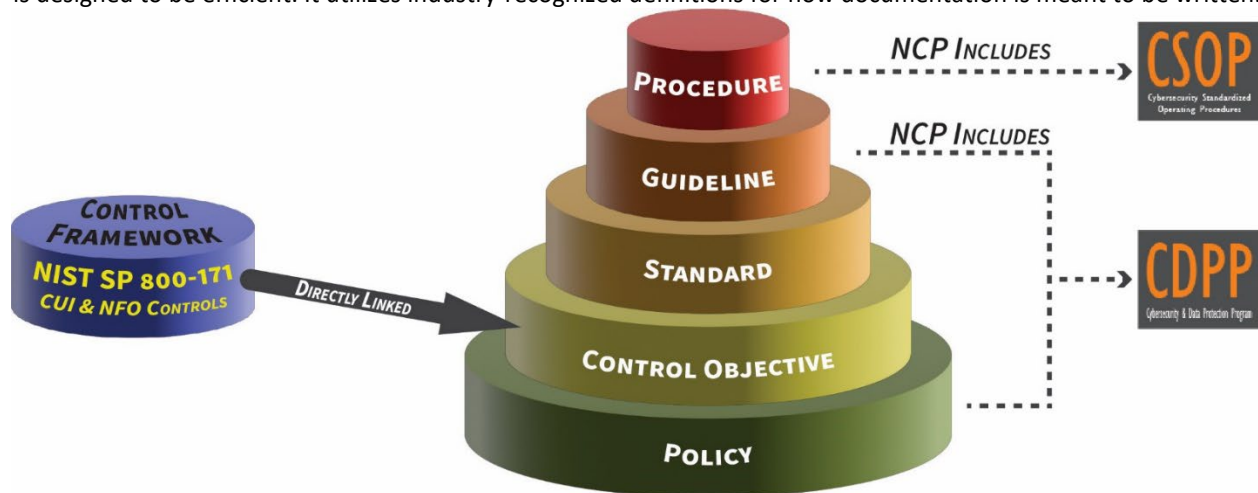

The NCP is a bundle of documentation. The NCP is a collection of several documents that you need to demonstrate compliance:

When you purchase the NCP, you receive an electronic download with a significant amount of documentation templates. These documents are specifically designed to help you efficiently and effectively comply with NIST SP 800-171 and CMMC Levels 1-2.

## HIERARCHICAL STRUCTURE

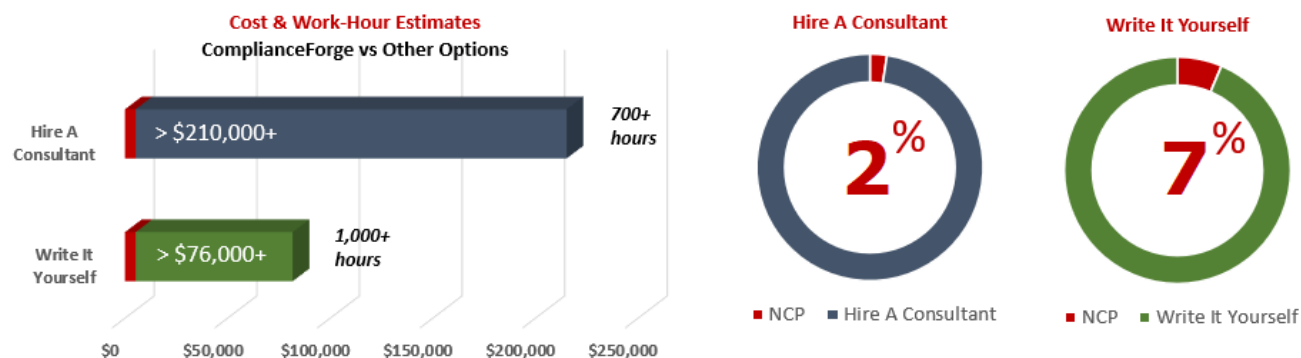

The NCP is designed to be efficient. It utilizes industry-recognized definitions for how documentation is meant to be written.

## COST SAVINGS ESTIMATE - NIST 800-171 COMPLIANCE PROGRAM (NCP)

The NCP is approximately 2% of the cost for a consultant or 7% of the cost of your internal staff to generate equivalent documentation.

For your internal staff to generate comparable documentation, it would take them an estimated 1,000 internal staff work hours, which equates to a cost of approximately \$76,000 in staff-related expenses. This is about 9-18 months of development time where your staff would be diverted from other work. If you hire a consultant to generate this documentation, it would take them an estimated 700 consultant work hours, which equates to a cost of approximately \$210,000. This is about 4-12 months of development time for a contractor to provide you with the deliverable.
